What is coronavirus disease 2019 (COVID-19)?

COVID-19 is a respiratory illness caused by a coronavirus.

How does COVID-19 spread?

Coronaviruses are most commonly SPREAD from an infected person through:

- Droplets when you cough or sneeze
- Close personal contact, such as touching or shaking hands
- Touching something with the virus on it, then touching your eyes, nose or mouth before washing your hands

These viruses are not known to spread through **ventilation systems** or through **the water**.

What are the symptoms of COVID-19?

FEVER

COUGH

DIFFICULTY BREATHING

What is WISH Doing?

·All staff are wearing gloves while on the floor and constantly washing their hands. We have also implemented enhanced daily cleaning and disinfection protocols.

·We have moved some of the lounge chairs into the learning centre, making the space larger so you can relax without being too close to each other.

·Make-up and clothing donation rooms are temporarily closed.

·Just essential services will be kept at this point - showers and meals.

·All group programming has been suspended.

We are offering:

· Meals wrapped and ready to be taken out.

· To-go hygiene kits with shampoo, conditional, soap, body wash, and body lotion - ask staff for one.

· **To-go hand sanitizer – ask staff for one.**

What can you do?

Wash your hands often with soap and water for at least 20 seconds.

Avoid touching your eyes, nose or mouth, especially with unwashed hands.

Avoid close contact with people (self-distancing).

Cover your mouth and nose with your arm or tissues to reduce the spread of germs — immediately dispose of any tissues you have used into the garbage as soon as possible and wash your hands afterward.

Use hand- sanitizer constantly.

If you have flu-like symptoms please report it to staff and ask for a mask.

DO NOT wear a mask if you don't have any symptoms.

If it is possible for you to stay at home during this difficult time, we encourage you to do so. If not, WISH is here to help you.
